

# BIO DIAR

*phytobiotic*

## **ADVANTAGES OF USING BioDiar®:**

- **Powerful anti-inflammatory**
- **Reduces incidence of diarrhea caused by common intestinal pathogens**
- **Improves palatability and feed intake, growth rates and feed conversion ratio**
- **Provides extra protection during stressful periods**
- **Maximizes intestinal health**
- **Strengthens the immune system**
- **Powerful antioxidant**
- **Improved fertility**
- **Easy to use**

**100%**

- natural**
- no withdrawal**
- safe**
- antibiotic free**

oral solutions: 100ml, 1L, 5L

premix : 100g, 1kg, 10kg

# prevention and stopping diarrhea

## Swine

*Increase appetite of swine. Improve weight gain.  
Improve feed utilization (feed conversion) at all stages of production from sow to finishing animals.  
Maintain good intestinal health of pregnant and nursing sows.  
Reduce transmissions of pathogens from sows to piglets.  
Reduce incidences of intestinal diseases like ileitis, swine dysentery, and diarrhoea caused by Clostridium, E.coli, Salmonella, worms and other pathogens.  
No residue of oregano essential oil in meat.*

## Poultry

*Improve weight gain and feed utilization (feed conversion).  
Improve laying performances of breeders and layers.  
Reduce incidences of wet faecal material and diarrhoea.  
Reduce incidences of intestinal diseases like coccidiosis(Eimeria), necrotic enteritis (Clostridium perfringens), enteritis, worms and other pathogens.  
No residue of oregano essential oil in meat and eggs.*

## Chicken layers/breeders

*More frequent egg production.  
Elongated maximum point of lay.  
Reduction in numbers of dirty eggs.  
Reduction in numbers of cracked eggs.*

## Chicken broilers

*Faster weight gain to harvest.  
Improved feed conversion ratio.  
Improved poultry efficiency factors.*

## Ruminant

*Superior immune defence in milk colostrum.  
Faster weight gain for cows and calves.  
Reduced diarrhoea episodes.  
Absence of gut fermentative interference.*

**INGREDIENTS:** chestnut, carob, oregano, thymus, clove

**DOSAGE: Oral solution:** poultry, swine, sheep: 1 liter per 1000 liters of drinking water, cattle: 100 ml per 150kg BW, calves: 50-150 ml per animal, sheep: 10 ml per 15kg BW, divided into 2 equal doses per day, minimum 3 days  
Piglets: individual treatment, per os, 1 ml per 10kg BW daily, 3- 7 days  
**Premix:** via feed, 2 kg per 1 ton of ready fooder mixture. If all animals on farm are using Biodiar for 4 weeks, dose can be decrease every week by 100g, until to 1.3kg/T feed.
