

Histovet

phytobiotic against histomoniasis

Histovet

a solution in the fight against histomoniasis

Histovet is phytobiotic with essential oil compounds selected from the group consisting of cinnamaldehyde, 2-decenal and nerolidol with strong activity against *Histomonas* spp.

Histomonas meleagridis is species of parasitic protozoan that infects a wide range of birds including turkeys, chickens, peafowl, quail and pheasants, causing blackhead disease, infectious enterohepatitis, or histomoniasis
