

FirstGel

gel supplement with probiotic for one day calves for head start and digestive and imuno supplement for older calves

FirstGel is the first choice for farmers who want to give their newborn calves a head start.

First Gel is effective

It is made from concentrated vitamins A, D3, E, C, and K, with Omega 3, 6, 9 fatty acids and probiotics Lactobacillus, Saccharomyces and Rhodopseudomonas with inulin gets the newborn up and nursing faster, giving it the head start it needs.

Products for healthy, high-performance calves

They improve organism immunity to bacterial infections and favour colonisation of positive bacterial flora repeat application in next 6-12 hours.

Older Calves

Fighting against diarrhea and stress as cause of many disorders in older calves best solution is First Gel - application 50ml, twice a day, 3-5 days.

FirstGel is convenient and easy to use

FirstGel comes in an easy to use 100ml tube. No pails, no mixing and no feeding tubes. Just put the tip of the dosing syringe on the back of the calf's tongue and push the plunger slowly. It's a good idea to carry a couple of tubes of FirstGel in your pocket every time you check the calving pen.

FirstGel is the right dosage

FirstGel concentrated formulation, in a 50 ml dosage size, helps newborn calves get started without filling them up so they are hungry for their first feeding of colostrum.
