QUALITATIVE AND QUANTITATIVE COMPOSITIONi 11ml : Thymol 7,80 g, Eucalyptus oil 1,6g, Camphor, racemic 0,36 g,n Levomenthol 0,36 g.

ThymovetPlus is natural product for treatment of varroosis caused by Varroa destructor.

Contraindications :Do not use during honey flow in order to avoid tainting the taste of the honey. Do not use when maximum daytime temperature is above 30°C. For maximum efficacy use the product in late summer after the honey harvest, when the amount of bee brood present is diminishing. The ideal outside temperature for a good effectiveness of the product during the treatment ranges between 20-25°C.

Insufficient efficacy can be expected if the average outside temperature is lower than 15°C.

All colonies in the same apiary should be treated simultaneously to avoid robbery.

Avoid disturbance to the hive. Apply 10ml of product , devided on 4 strips dimension: (5 cm x 7 cm x 0,5 cm) for one beehive for 7 days. Repeat the treatment for 4 consecutive times.

Withdrawal period Honey: Zero days. Do not use during honey flow in order to avoid to adulterate the taste of the honey.

Special storage precautions: Store below 25°C. Do not refrigerate or freeze. Protect sachets from direct sunlight.

Protect from frost. Store the strip in the original packaging.Presentation: 100ml
