Excipients, PW, conservans, solvents up to .....	1L

TARGET SPECIES: horses

DOSE AND ADMINISTRATION:

Oraly , in mouth angle 5-10 days.

Individual use: for 5 to 10 consecutive days.

Horses: 50 to 80 ml per day,

young 30ml/day

ADVERSE REACTION: None.

WITHDRAWAL PERIOD: None.

SPECIAL PRECAUTIONS: Store in a dry and cool place protected from humidity and light. Keep away from children. Keep in closed containers.

WAY OF ISSUE: Without a prescription.

HEPAREN detox has a strengthening effect on the metabolism and immunity, improving appetite and feed utilization. The big advantage is its stabilizing effect on parenchymal organs (liver, kidneys) especially valuable for frequent practice poisoning. Preferably also interacts water intake is reduced. Sorbitol: stimulates biliary functions therefore nutriments assimilation (especially emulsification of fats and absorption of fat-soluble vitamins: A, D, K and E). Choline: is an acetylcholine precursor, involved in lipid metabolism. Betain: methyl containing amino acid, its lipotropic function avoids fatty liver. It has a role of an osmotic agent that is used by the cells in order to protect from osmotic stress, dehydration or heat stress. Lysine: an alphatic amino acid which is an essential constituent of the diet. L carnitine has essential role is in the transport of long chain fatty acids to the mitochondria, which provides the energy necessary for the physiological function of the cell, and also prevents fat accumulation. It positively affects the secretory function of the pancreas, spermatogenesis and sperm motility, as well as weight gain, fetal development, growth and development. By improving and stimulating hepatic, biliary and intestinal functions, HEPAREN detox facilitates the digestion of all nutriments and the elimination of toxins during intensive production period or when changing diets. Mixed herbal tinctures helps for appetite and better function for liver and kidney.
