

# ASPIVETO

Feed additives for animals in powder

## COMPOSITION:

Natural components:

- White willow
- Meadowsweet

## USE:

It has antipyretic, analgesic, anti-inflammatory and antiseptic effect, guaranteed 100% natural.

As an abundant source of natural salicylic it prevents the production of prostaglandins, which caused inflammatory response. It has been used as an herbal remedy for pains, edema and redness, facilitation of the movement joint, and many types of inflammation. It is widely recommended in the treatment of acute and chronic pain, arthritis and tendinitis, high temperatures (fever). It is also useful in reducing number of somatic cells in milk in the case when mastitis symptoms occur, after minimum 2 weeks of using.

Generally Aspiveto could be used for longer period without any restrictions. It does not cause any changes in the stomach, intestines or liver.
