

Aspiveto Gel

Feed additives for animals in gel

COMPOSITION:

Natural components:

- Wintergreen essential oil

Preservatives and solvents:

- Glycerin
- Xanthan gum
- Purified water

USE:

Wintergreen essential oil contains about 98% of methyl- salicylate, a natural substance with antipyretic, analgesic and anti-inflammatory effects.

As an abundant source of natural salicin it prevents the production of prostaglandins, which caused inflammatory response. It has been used as an herbal remedy for pains, edema and redness, facilitation of the movement joint, and many types of inflammation.

It is widely recommended in the treatment of acute and chronic pain, arthritis and tendinitis, elevated temperatures. It is also useful in reducing somatic cells counts in milk in the case when mastitis symptoms occur. In case of poultry is used for the prevention of heat stroke and high temperature conditions.

Prevention of heat stroke: in the morning hours, when risk of heat stroke occurs-high temperatures are expected.

It is widely recommended in the treatment of acute and chronic pain, arthritis and tendinitis, elevated temperatures. It does not cause any changes in the stomach, intestines or liver.
