

BE-SL

Feed additives for animals in oral form

COMPOSITION:

Natural components:

- Anise essential oil
- Rosemary tincture
- Lemon Balm Tincture
- Valerian tincture

Trace elements:

- Magnesium

Amino acids:

- Betaine

Preservatives and solvents:

- Glycerin
- Purified water

USE:

BE-SL is recommended for end of fattening or exploitation period, before slaughter, transportation or on any other case of stress. It helps to animal for better feed intake and feed consumption.

Anise and rosemary produces a beneficial effect in period of water and feed intake disorders.

Melissa, Valerian and Mg makes animal more relax, not losing weight during transport or any other stressful situation. Animals are relaxed but not tranquilized and willing to eat.

Betaine has a role as an osmotic agent that is used by the cells in order to protect from osmotic stress, dehydration or high temperatures.

Using BE-SL product save money to farmers and make better profit!
