

# CocciProtect

Feed additives for animals in oral form

## COMPOSITION:

Natural components:

- Oregano
- Garlic
- Thyme
- Sage
- Echinacea
- Rosemary
- Siberian fir
- Juniper

Preservatives and solvents:

- Glycerin
- Purified water

## USE:

Coccidiosis is a parasitic disease caused by the development and multiplication of coccidian (*Eimeria* spp.) in the intestinal tract.

Coccidia are ubiquitous; they exist wherever poultry are reared and their survival is assured by a highly resistant form of transmission - the oocysts - which may survive for several months in the environment.

Despite hygiene measures, drug prophylaxis and vaccination, coccidian remain a major problem in poultry rearing. Also residual of chemical coccidiostats are bigger and bigger problem, as impact to human health.

In that reason herbal coccidiostats are real and efficacies solutions for treatment poultry against coccidiosis.

CocciProtect is herbal product with strong activity on *Eimeria*, prevents intestinal disorders, favors the development of beneficial flora, promotes digestive processes and improves daily growth.

CocciProtect acts on the digestive tract protecting the integrity of the intestinal mucosa, which is constantly exposed to environmental antigens and represents the first line of defense of lymphoid tissue. It contributes to improve nutrient absorption and prevents tissue damage that can lead to dehydration, diarrhea, blood loss and mortality. CocciProtect helps to keep the

digestive system healthy and free of pathogens, contributing directly to the development and stimulation of the immune system of the animal.

Cocciprotect is carefully selected herbal mix with essential oils and natural vegetable extracts of plants with antimicrobial properties. These components act on the gastrointestinal tract to inhibit the growth of intestinal parasites such as E. Coli, Salmonella spp, Clostridium Perfringens, Campylobacter and protozoan parasites.

**TARGET SPECIES:** poultry, turkey, rabbits and ducks

**DOSAGE:**

The dose for all animals is 1ml per 1L in drinking water, daily.

At the onset of symptoms of coccidiosis dose is 1,5l /1000 l of drinking water, for seven days, and the continue with a dose of 1l/1000 l of drinking water.

**CONTRAINDICATIONS:** None described

**ADVERSE REACTION:** None

**SPECIAL PRECAUTIONS:** Store in a dry and cool place protected from humidity and light. Keep away from children. Keep in closed containers.

**WAY OF ISSUE:** Without a prescription

**PRESENTATIONS:** 1L

**ANIMAL CONTROL FACILITY NUMBER:** α RS 31-029

**PRODUCER NAME AND HEADQUATERS:** Vetplanet doo, Vrsac, Vojvodjanskih brigada 16, Serbia
