

FirstGel chicken

Feed additives for animals in powder

COMPOSITION:

Vitamins:

- Vitamin A
- Vitamin D3
- Vitamin E
- Vitamin B1
- Vitamin B2
- Vitamin B6
- Vitamin B12
- Vitamin PP
- Biotin
- D-pantothenic acid
- Vitamin H 1
- Betaine

Amino acids:

- DL-Methionine
- L-Lysine
- Threonine
- Tryptophan
- Glutamine

Nutritional Supplements:

- Calcium chloride
- Sodium chloride
- Sucrose
- Potassium chloride
-

Natural components:

- Rosemary oil

Probiotics:

- Bacillus licheniformis
- Bacillus subtilis

Preservatives and solvents:

- Sodium propionate
- Sodium citrate
- Magnesium acetate
- Sodium acetate
- Gelatin

Original moisturizing gel for immediate feeding of young poultry.

Dehydration of day-old chicks can be a big problem with poultry producers. From heat and humidity in incubators and trips to the farm, often over long distances at high temperatures, it is possible for one-day-old chicks to dehydrate. Without water and other essential nutrients the result can be significant weight loss and what follows is suboptimal growth.

USE:

FirstGel chicken is a powder that, when dissolved in water, is converted into a gelatinous mass.

Dissolve the powder from the box in 10L of water and divide it into portions, a transport box for day-old chicks, cages for transporting poultry or to the floor of the building.

The powder contains all necessary vitamins, amino acids, trace elements, betaine (which prevents the dehydration of the body), and probiotics that help in antistress situations, and regulate the intestinal flora.

The preparation also contains EO Rosemary, which intensifies the desire for food intake, especially in the first days of life.

The combination of vitamins and amino acids, helps to strengthen the immune system, relieve the symptoms of stress caused by vaccination, large temperature fluctuations and transport.

BENEFITS:

- *Better start, lower mortality and weight loss during transport to the farm - better quality chickens*
- *Reduced mortality and better growth in the first 7 days*
- *Helps prevent dehydration and helps overcome service stress*
- *Provides a valuable source of nutrients*
- *Encourages early food intake*
- *Stimulates the development of the digestive system*
- *Superior production capability and better final weight*
- *Stable gel provides even suspension*
- *Perfect for insoluble ingredients*
- *Individual drops of the gel are easily noticed and consumed*
- *Will not soak feathers*

- *Ideal for use in poultry delivery systems*
- *Outstanding return on investment*

TARGET SPECIES: Poultry

DOSAGE:

Pour the pack powder into 10L of water, stirring for a few minutes until a gelatinous mass is formed. Then divide into chunks, a transport box for day-old chicks, cages for transporting poultry or to the floor of the building.

One pack of Firstgel Chicken is intended for 10,000 pieces of day-old chicks or 450kg of TM adult poultry.

Chickens: A pack of powder is sufficient for 5,000 turkeys or 225kg of TM adults

CONTRAINDICATIONS: Not described

SIDE EFFECTS: None

WITHDRAWAL: No withdrawal period

STORAGE PRINCIPLE: Up to 25°C, protected from moisture and light. Keep out of reach of children. Store in a closed container.

METHOD OF ISSUE: Available without a prescription.

PACKAGING: 500g

OBJECT VETERINARY CONTROL NUMBER: αRS 31-029

MANUFACTURERS NAME AND SEAT: VetPlanet doo Vršac, Vojvodjanskih brigada 16, SERBIA
