

HistoVet

Feed additives for animals in oral form

COMPOSITION:

Natural components:

- Oregano oil
- Cinnamon leaf oil
- Clove oil
- Eucalyptus oil
- Thymus crystal oil

Vitamins:

- Vitamin A
- Vitamin E
- Vitamin B1
- Vitamin B2

Preservatives and solvents:

- Purified water

USE:

Histomonas meleagridis is species of parasitic protozoan that infects a wide range of birds including chickens, turkeys, peafowl, quail and pheasants, causing blackhead disease, infectious enterohepatitis, or histomoniasis. *H. meleagridis* can infect many birds, but it is most deadly in turkeys. It inhabits the lumen of cecum and parenchyma of liver, where it causes extensive necrosis. It is transmitted by another cecal parasite, the nematode *Heterakis gallinarum*.

HistoVet belongs to the group of phytobiotics with significant properties to *Trichomonas* spp., *Histomonas* spp. and anaerobic germs; The action against flaked protozoans is potentiated by many ingredients of this product like cinnamaldehyde, thymol, nerolidol and 2-decinal.

It is advisable to provide as a support for hydro soluble and lip soluble vitamins and minerals. HistoVet can be given and combined with all supplements and medicines.

TARGET SPECIES: turkey, poultry, pigeons, zoo birds

DOSAGE:

Turkey, poultry: 1 L per 1000L water, 7 days before and 7 days after expecting problems between 3.th and 5.th week). In situations where symptoms have already appeared dose is 1,5-2 L /1000L water for 10 days.

CONTRAINDICATIONS: None described

ADVERSE REACTION: None

WITHDRAWAL PERIOD: None

SPECIAL PRECAUTIONS: Store in a dry and cool place protected from humidity and light. Keep away

from children. Keep in closed containers.

WAY OF ISSUE: Without a prescription.

PRESENTATIONS: 1L

ANIMAL CONTROL FACILITY NUMBER: α RS 31-029

PRODUCER NAME AND HEADQUATERS: Vetplanet doo, Vrsac, Vojvodjanskih brigada 16, Serbia
