

VetCalm Gel

Feed additives for animals in gel

COMPOSITION:

Natural components:

- Valerian extract
- Lemon balm extract
- Vetiver extract

Trace elements:

- Mg sulphate

Preservatives and solvents:

- Glycerin
- Xanthan gum
- Purified water

USE:

VetCalm Gel with its balanced mixtures of herb extracts acts against stress and anxiety.

Melissa officinalis (lemon balm) and Valeriana officinalis (valerian) have been used both traditionally and contemporaneously as mild sedatives, anxiolytics and tranquillizers. Animals are relaxed but not sedated. Magnesium sulphate as dietary supplement together with plants extracts helps to reduce stress, and makes animals more calms in stages of the periods of intensified stress such as transport, temperature, veterinary procedures. As product has no residual effect on meat, it can be used before slaughtering. Using products by prescription has no influence on daily weight gain.
