ABOUT COMPANY

VetPlanet doo is specialized in the production and marketing of veterinary supplements. HACCP certified production and portfolio includes a wide range of unique animal supplements and complementary products that promote a health and animal welfare. A special line of our products, which are new in veterinary medicine in this area, consist of supplement enriched with plants extracts and essential oils. Our company aligns market needs with latest research and creates new production formulations, thanks to intensive cooperation with veterinary faculties and institutes in the country and region, as well as collaboration with colleagues from veterinary field.

VISION OF THE COMPANY

The company's goal is sustainable growth, sustained long-term development and active participation in rising the competitiveness of Serbian vets. The company is export -oriented, with the ambition to play role in world market.

BioDiar

for quick stopping diarrhea

INGREDIENTS: Sweet chestnut extract, Clove essential oils

PROPERTIES OF THE INGREDIENTS: Biodiar gel is a 100% natural product that has a local astringent, anti-inflammatory and antibacterial action, based on the presence of tannins and eugenol. Antidiarrheal Biodiar gel effect is very fast and reliable.

DOSAGE AND ADMINISTRATION:

Dogs and cats: 1ml/4kg of BW

Capsules: 1 capsule -small dog and cat

2 capsules for middle dogs

3 capsules for big dogs

PRESENTATION: gel-20ml, 60ml, 100ml

Capsules: 60

MultiPower Biotic

*Vitamins - Minerals - Amino acids complex
with probiotic cultures*

INGREDIENTS: Probiotics + amino acids, vitamins, macro and micro elements

PROPERTIES OF THE INGREDIENTS: MultiPowerBiotic Gel is a carefully chosen combination of vitamins minerals, amino acids, and probiotics which helps to strengthen the immune system, during and after the bacterial and viral infections. It also acts synergistically to antibiotic therapy after antioccidial and other antiparasitic therapy. MultiPowerBiotic relieves stress symptoms caused by vaccination, diseases, high humidity, high temperature, large temperature fluctuations, specimens transfer to a new environment or transport. It works to increase appetite, conversion and utilization of food.

DOSAGE AND ADMINISTRATION:

divided in 2-3 daily portions

Dogs: 20-25ml

Cats: 10-15ml

PRESENTATION: 20ml, 60ml, 100ml

AntacidGel

Gel supplement for neutralization gastric acid

INGREDIENTS: Trigonella foenum graecum, White horehound and Ginger, essential oils of Lavander and Pepermint, salts of aluminum and magnesium, bicarbonate soda

PROPERTIES OF THE INGREDIENTS: Complex of dry extracts and essential oils of plants and inorganic compounds that neutralize hydrochloric acid in gastric juice. It is used to prevent all pathological changes in the gastrointestinal tract aimed at reducing hydrochloric acid and increasing the pH of the stomach, as well as alleviating pain in gastritis, the peptic ulcer.

DOSAGE: By pushing out the contents of the syringe into the mouth in the required daily doses.

Dogs and cats: 1ml/5kg of body weight, 2-3 times a day, 3-5 days.

Animals that have less than 5kg of body weight, the dose is 1ml.

PRESENTATION: 20ml, 60ml, 100ml

RespiGuard

Gel supplement for respiratory infections

INGREDIENTS: Garlic tincture, Eucalyptus oil, Thymus tincture

PROPERTIES OF THE INGREDIENTS:

RespiGuard is recommended for prevention and help in treatment of respiratory infections of different etiology. RespiGuard solution contains a high concentration of natural garlic extract and eucalyptus. The active ingredient of garlic is allium sulfate. It has antibacterial, antiviral, antifungal anti-parasitic and anti-inflammatory effect. It strongly supports cardiovascular and immune systems; stimulate lipid metabolism; play a role in the liver protection and regeneration.

Eucalyptus oil expands respiratory pathways and thereby facilitates breathing. The composition has a secretolytic effect, thereby allowing easier release of the products from the respiratory tract infection. Cineol 1.8, compound of Eucalyptus has also very strong antibacterial effect.

Thymus tincture increase immunity status and helps on antibacterial effect of RespiGuard. It has strong antibacterial and anti-inflammatory effect, with impact to stimulate immune system, improved absorption of nutrients secure easier breathing.

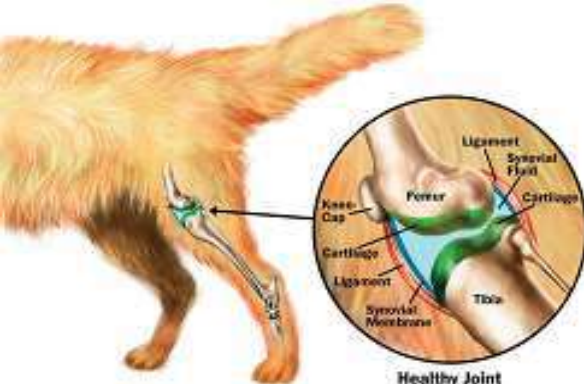

DOSAGE : By pushing out the contents of the syringe into the mouth in the required daily doses.

Dogs and cats: 1ml/5kg of body weight, 2-3 times a day, 3-5 days.

Animals that have less than 5kg of body weight, the dose is 1ml.

PRESENTATION: 20ml, 60ml, 100ml

Hip&JointStar

Articulation supplement

COMPOSITION: glucosamine, chondroitin sulfate, MSM, hyaluronic acid, vitamins C, manganese, Natural Components: Turmeric, Eagle Claw, white willow bark, yeast

PROPERTIES OF THE INGREDIENT: HIP&JOINT Star is an advanced formula that protects the joint by promoting healthy joint tissue, normal function and flexibility. Glucosamine and chondroitin are natural compounds that provide the strong support needed to maintain healthy cartilage. Hyaluronic acid is a key component that naturally lubricates joints and helps to relieve shock. An MSM compound containing sulfur and other beneficial ingredients is a well-known supplement for supporting healthy joints. MSM promotes normal physical performance of healthy connective tissue and cartilage. Turmeric, eagle claw and white willow bark are herbal ingredients that have a long tradition of being used to maintain healthy joints, help reduce oxidative stress and manage occasional joint discomfort. They provide support for the physiological function of range of motion in the joint. Yeast helps digestion more easily.

DOSAGE: Gel - 1.5ml gel daily at 20kg body weight. It can be given over a long period of time. In severe cases, daily dose can be repeated at 12 hour intervals. It applies equally to dogs and cats.

PACKAGING: Gel 20ml, 60ml, 100ml
TABLET 60 tablets: 1 capsule / 10kg BW

HepaRen detox

Detoxication gel and liver tonic supplement

COMPOSITION: sorbitol, choline chloride, L carnitine, betaine, lysine, artichoke, rosemary, parsley, wormwood, fenugreek

PROPERTIES OF THE INGREDIENT: HEPAREN detox has a strong effect on metabolism and immunity, increases appetite and food intake, as well as maintains the stability of parenchymatous organs, such as the liver and kidneys, which is especially important in poisoning. It is also recommended when water intake is reduced.

Sorbitol: stimulates bile function. Choline is involved in lipid metabolism.

Betaine prevent the formation of fatty liver. It has a role that protects the cell from stress, dehydration and heat stroke. Lysine: an amino acid as an important component of the diet. L carnitine prevents fat buildup. It has a positive effect on the secretory function of the pancreas. A mixture of herbal extracts stimulates appetite, promotes and stimulates liver, bile and intestinal function.

DOSAGE: administered for at least 10 days
- Puppies 2-5ml / day, Adult dogs 10ml / day - Young cats 2 ml / day, Adult cats 5 ml / day
In severe forms of fatty liver, it can be given pulsed with a break of 7 days.

PACKAGING: 20ml, 60ml, 100ml

Probiotic VP

Probiotics For Your Pets

Probiotics are living microorganisms that, when introduced into the digestive system, have beneficial effects on the host animal by altering the gastrointestinal flora. The effect on the gastrointestinal tract is that the benefits of probiotics for dogs and cats include maintaining the gut microbiota in balance and boosting a healthy population of microorganisms. In this regard, they also lead to the consequent prevention of diarrhea associated with stress, infectious causes or antibiotics, and in addition have an effect on chronic intestinal tract diseases.

Immunostimulation of probiotics is expressed through a direct effect on the lymphoid tissue of the intestine and immunoglobulins.

COMPOSITION: Probiotics of Bifidobacterium, Lactobacillus genus and inulin (FOS)

PACKING: 60 capsules

MultiPower in the effervescent tablets

NEW

MultiPower

Vitamino-mineral supplement

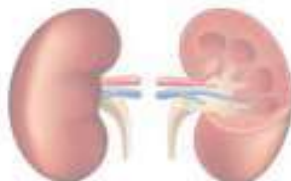

COMPOSITION: Vitamin C, A, D3, E, B1, B2, B6, B12, niacin, folic acid, biotin, Cu, Mn, Zn, Fe.

PROPERTY OF INGREDIENTS: Vitamins play different roles in the body: as coenzymes they participate in different, important biochemical reactions, participate in carbohydrate metabolism and provide the energy needed for normal body function. Any condition that increases energy demand, such as stress, infections, high productivity, requires additional intake of this complex. MultiPower is essential for creating a good immune response, participating in cellular respiration, formation of erythrocytes and antibodies. Recommended for stimulation the immune system in disease states and the course of vaccination. They have an important one role in the release of the body from toxins and harmful substances, as well as in restoring the liver and preventing fat degeneration. These vitamins play a role in prevention of sterility and maintaining a healthy nervous system. They also participate in the synthesis of hormones and neurotransmitters. Recommended for neuronal diseases symptoms, prevention of fatty liver disease, antibiotic therapy and so on...

DOSAGE: Puppies: ½ tablets / 10kg BW, Dogs: 1 tablet a / 10kg BW
Cats: 1 tablet a / 10kg BW

PRESENTATION 50 tablets **EFFERVESCENT TABLETS:** single pack

Urovet

supplements for kidney problems and urinary tract

COMPOSITION: bear, pomegranate, fennel, caraway, parsley, artichoke, vitamin C, sorbitol

PROPERTY OF INGREDIENTS: Sorbitol is an osmotic diuretic, used in kidney disorders and chronic renal failure caused by increases in blood nitrogen and oliguria and disorders caused by hypovolemic shock or trauma. Its long-term use does not cause disturbances in electrolyte balance, does not cause excessive loss of potassium and is very effective in treating the heart because it does not interfere with the heart impulses.

Dry plant extracts are used in the treatment of kidney and bladder. They are powerful diuretics, they help to eliminate kidney and gall stones. They accelerate the excretion of toxins and lower blood sugar levels. It has an effect on the liver, bile, urea metabolism and cholesterol secretion. They also work against inflammation.

DOSE: To be given by mouth 1ml / 5 kg BW twice daily.
Duration of treatment up to 6 months, or until symptoms disappear.

PACKAGING: Syrup 250ml with syringe for oral administration.

OmegaMSM

Skin and fur syrup

COMPOSITION: Omega 3, 6 fatty acids and MSM, biotin

PROPERTY OF INGREDIENTS: The functions of omega 3 fatty acids are numerous and very significant, they are part of all cell membranes and structures, affect the absorption of fat soluble vitamins (A, D, E, K), regulate the metabolism of blood fat (triglycerides, cholesterol). they generate energy in the body, affect the development of brain cells, aid the function of the immune system, participate in the synthesis of certain hormones, prevent the onset of cardiovascular disease because they affect the regulation of blood pressure, against arrhythmia and prevent the onset of atherosclerosis, reduce the tendency of thrombosis. Omega 6 fatty acids help reduce nerve pain, they are especially important for maintaining bone health, regulating metabolism and therefore stimulating the growth and renewal of skin and hair. They participate in the fight against inflammation, reduce blood pressure, reduce the risk of heart disease.

MSM is methylsulfonylmethane, the organic form of sulfur and the fourth most important mineral in our body. It has anti-inflammatory, antioxidant, immune-modulation. It is used as a natural element which helps relieve joint pain, a natural mineral that helps treat allergies and inflammation. MSM is important for the formation of keratin, collagen and elastin, which provide flexibility, shape and strength to muscles, bones, joints, inner membranes, skin, hair and nails.

DOSAGE: 1ml / 5kgBW, 7-10 days. It can be given over a long period of time.

PACKAGING: 250ml with syringe for oral administration

CardioTonic

Tonic for heart and blood vessels

COMPOSITION: hawthorn, white mistletoe, valerian root and root gentian

PROPERTY OF INGREDIENTS: The active ingredients of medicinal herbs included in Cardiotonic have a beneficial effect on normalizing the heart rhythm, regulating high blood pressure, microcirculation and blood viscosity. Also, the active ingredients have a calming effect on the nervous system, so use is recommended for disorders of heart rhythm, tachycardia and heart problems caused by stress and tension.

DOSAGE: Dogs and Cats - 1ml / 5kg BW.

PRESENTATION: 250ml

INGREDIENTS:

Gel: Vitamin C

Capsuls: Vitamin C+Zn

PROPERTY OF INGREDIENTS: Vitamin C

is the strongest antioxidant. It has many important roles in organism: collagen production, synthesis and production of steroid hormones-anti-inflammatory effect and treatment of functional sterility, synthesis of neurotransmitters, maintains normal capillary function, increases the body's resistance to infections, accelerates blood coagulation and is necessary for wound healing. Stress, greater physical exertion, infectious diseases, pregnancy and lactation increase the need for this vitamin.

Vitamin C

Vitamin C in gel and capsuls C+Zn

C+Zn capsules - Zinc is an integral part of numerous enzymes that participate in the vital processes of the body. It is also important for the regulation of hormones in the body. It also exhibits immunity stimulant properties, Zinc promotes bone regeneration, and on the skin and mucus, the skin acts against microorganisms, drying out and tightening the surface of the skin and mucous membranes.

DOSAGE: gel 1ml / 5kg BW

Capsules: 1-3 capsules daily depending on the size of the dog (small, medium, large)

PRESENTATION: Gel 20ml, 60ml, 100ml Capsules: 60 capsules

AspiVeto

herbal aspirin

COMPOSITION: EO Wintergreen, powders of Kale, Willow bark

PROPERTY OF INGREDIENTS: Natural salicin prevents the production of prostaglandins, which cause an anti-inflammatory response, and thus helps with all inflammatory processes by reducing inflammation symptoms, edema and redness, reducing pain, facilitating joint movements. Recommended for acute and chronic pain conditions, arthritis and tendinitis, fever.

DOSAGE: 1-3 times a day, depending on the degree of illness and need 5-7 or 10 days.

Dogs: 1ml / 3kg BW

Horses: 10ml / 30kg BW

PRESENTATION: gel- 20ml, 60ml, 100ml, 300ml
Capsules: 60 capsules

Ferti M

Male fertilization supplement

COMPOSITION: Vitamin C, L Carnitine, Vitamin E, Biotin, Zn, Se

PROPERTY OF INGREDIENTS: The use of Ferti M has a major impact on spermatogenesis. After 20 days of use, the animals generate more sperm. Ferti M affects in strength, mobility and prolongation of vitality in the male reproductive organs. All together, this effect results in an increase in the number of newborn vital individuals.

DOSAGE: 3-4 weeks, or extended if it is necessary.
small male dogs and male cats 1 capsule, medium male dogs 2 capsules,
large male dogs 3 capsules per day

PRESENTATION: 60 capsules

Ferti FM

Female fertilization supplement

COMPOSITION: Vitamin C, L Carnitine, Vitamin E, Biotin, Folic Acid, Se

PROPERTY OF INGREDIENTS:: The use of Ferti FM results in the optimal regeneration of the reproductive organs, which must be ready for rapid entry into new gravity. It improves egg production, increases their number and conception. Ferti FM encourages the realization of genetic potential, increases the number of healthy and vital newborns and litter uniformity.

DOSAGE: 4-6 weeks
small dogs and cats 1 capsule, medium dogs 2 capsules,
large dogs 3 capsules daily

PRESENTATION: 60 capsules

PetCalm

De-stress and calming natural solution

INGREDIENTS: Essential oils (Valeriana officinalis, Vetivera zizanoides, Salvia officinalis, Ocimum basilicum, Melissa officinalis) Fragrance bland -Lavandula angustifolia Mill.

PROPERTIES OF THE INGREDIENTS: PetCalm with its carefully selected essential oils acts against stress and anxiety. Animals are relaxed but not sedated. By increasing GABA (gamma-amino butyric acid), natural chemicals produced in the brain, the state of relaxation is achieved. A soothing message is transmitted from nerve to nerve.

DOSAGE AND ADMINISTRATION:

Kind and size of animal	pack 300ml - standard size	Pack 50ml - pocket pack
Small dogs, cats, rabbits, birds	3-4	10-15
Middle size and big dogs	5-7	20-28
horses	7-10	

- acting fast - in 20 min.
- last for 2-4 h
- safe, clinically proven
- pleasant smell
- good for skin and coat
- use on dogs, cats, rabbits, birds and horses

PRESENTATION: spray solution : 50ml, 300ml
- electric diffuser with bottle of 45ml

VetCalm

calming and de-stress gel / capsules

INGREDIENTS: Herbal mix of Valeriana officinalis, Melissa officinalis, Vetiver zizanoides, Mg sulphate, Essential herbal oils

PROPERTIES OF THE INGREDIENTS: VetCalm Gel with its balanced mixtures of essential oils and herbs acts against stress and anxiety. Melissa officinalis (lemon balm) and Valeriana officinalis (valerian) have been used both traditionally and contemporaneously as mild sedatives, anxiolytics and tranquilizers. Animals are relaxed but not sedated. Magnesium sulphate as dietary supplement together with plants extracts helps to reduce stress, and makes animals more calms in stages of the periods of intensified stress such as transport, temperature, veterinary procedures.

DOSAGE : Dogs: little 2ml, middle size 4ml, large 6-8ml, Cats: 2ml
Capsules: 1 caps./10kg BW

PRESENTATION: 20ml, 60ml, 100ml
Capsules: 60

ImmunoStrath

strengthening the immune system

COMPOSITION: Vitamins: C, A, D3, E, B1, B2, B6, B12, niacin, folic acid, biotin, Cu, Mn, Zn, Fe., Natural Ingredients: Thyme, Echinacea

PROPERTY OF INGREDIENTS: Vitamins and essential oils stimulate immunity in the best way, they protect animal health and support the treatment of diseased individuals. ImmunoStrath is used in all conditions in which immunity is needed, in the period of acute and chronic illness, convalescence, allergy stages. It is easy to administer ImmunoStrath when it is expected that immunity will drop due to stressful situations, insomnia, nervousness, aggression, increased activity during hunting or competition-exhibitions.

DOSAGE: Syrup, Dogs, Cats: 1ml / 5kg body weight, daily, for 7-10 days, with periodic recurrence before or after critical periods. Minimum dose is 1ml
Capsules: dogs, cats: 1 capsule per 5kg BW for 7-10 days.

PRESENTATION: 250ml syrup

Capsules:60

OligoBalance

Substitution Of Electrolits

COMPOSITION: Vitamins A, D3, E, C, K, B1, B2, B6 and B12, dexapanthanol, nicotinamide, choline chloride, lysine, sodium, potassium, calcium, dextrose

PROPERTY OF INGREDIENTS: The preparation is a source of highly bioavailable and easily digestible nutrients that help to establish the physiological balance of vitamins and electrolytes in animal organism. Recommended in all situations where it can occur dehydration and loss of electrolytes, especially during the recovery period, after diarrhea and vomiting. The complex of vitamins meets the needs of the body for recovery and by improving the overall condition of the animal.

DOSAGE: daily doses twice daily:
Dogs: 10-20ml
Cats: 5-10ml

PRESENTATION: gel: 20ml, 60ml, 100ml
Powder: 10g sachet-1L water

Vitamin B complex

INGREDIENTS Vitamins:
B1, B2, B5, B6, B7, B12

vitamin B complex in gel form

PROPERTY OF INGREDIENTS: The importance of the vitamin B complex is reflected in the many roles they play in the body, as coenzymes participate in various important biochemical reactions, participate in the metabolism of carbohydrates, and provide the energy needed for normal body function. Any condition that increases energy needs, such as stress, infections, high productivity, requires additional intake of this complex. They are involved in cellular respiration, erythrocyte and antibody production, and are necessary to produce a good immune response. They are recommended for illnesses, as well as vaccinations, for stimulating the immune system. They play an important role in releasing the body from toxins and harmful substances, as they participate in their metabolism in the liver. They stimulate liver regeneration and prevent fatty degeneration. These vitamins play a role in the prevention of sterility, participate in the synthesis of hormones, some neurotransmitters, and are important for maintaining healthy nervous system function.

Complex B forte helps with nerve symptoms, it is recommended for use in anticoccidial and antibiotic therapy, vaccination, to stimulate production and achieve high production results, to prevent fatty liver degeneration.

DOSAGE: in daily doses for 3-5 days:
Cats and small dogs: 1-2ml
Medium dogs: 4-5ml
Big dogs: 6-9ml

PRESENTATION: gel- 20ml, 60ml, 100ml

VitalPlus

energy booster

COMPOSITION: • Sesame oil, Palm oil, Linseed oil,
Vitamins: A, D3, E, C, K, Choline chloride

PROPERTY OF INGREDIENTS: VitalPlus gel should be applied when animals are weak, fatigued, in bad condition or in newborn animals that are unable to suckle enough colostrum. Animals that do not consume food due to avitality and hypothermia, by taking VitalPlus gel, receive the energy they need through mid-chain fatty acids, and vitamins provide immunity and general body resistance.

DOSAGE: Repeat treatment to a satisfactory result. Usage up to 7 days is recommended.

Dogs: 1ml / 4kg TM

Cats: 1ml / 4kg TM

The minimum dose per animal is 1ml.

PRESENTATION: 20ml, 60ml, 100ml

Balance

supplement for overweight pet

COMPOSITION: L carnitine, bean and green tea extracts, Omega 3 fatty acids

PROPERTY OF INGREDIENTS: L Carnitine - Provides the necessary energy for the physiological function of the cell, while also preventing the accumulation of fat. Omega 3 fatty acids are fat burners, while plant extracts have digestive enzymes (alpha amylase) to prevent the formation of simple sugars.

DOSAGE: 1ml /5kg BW

PRESENTATION :250ml with syringe for oral administration

SuperStar

Multivitamin-aminoacid-minerals supplement for old dogs

INGREDIENTS: Ginkgo biloba, L karnitin, Vitamin C, E , D3

PROPERTY OF INGREDIENTS: Ginkgo improves brain microcirculation, and improves brain oxygen supply. It has antioxidant effects, reducing fat oxidation and nerve cell damage due to oxidative stress. The anti-aggregation effect is manifested as a decrease in the possibility of thrombus formation.

L carnitine plays a role in the transport of long chains of fatty acids to the mitochondria, which provides the energy needed for the physiological function of the cell, while preventing the accumulation of fat. Recommended in diabetes, peripheral nerve disease characterized by tingling, spasms, damage to the heart muscle, decreased oxygen concentration in the brain, diseases of the heart and blood vessels (increased levels of fat in the blood, atherosclerosis), metal poisoning. Vitamin C boosts immunity. Vitamin D3 plays an important role in musculoskeletal system, while Vitamin E is a powerful anti-oxidant in neuromuscular system.

DOSAGE: 1 capsule per 10kg / BW

PRESENTATION: 60 capsules

for cats only

HairBall-Free

Supplement for solving the hairball problems in cats

INGREDIENTS: Malt extract, taurine, mineral oils, omega 6

PROPERTIES OF THE INGREDIENTS: Hairball FREE helps to prevent the formation of hairballs. It ensures that the hair flows smoothly through the cats intestines, thus preventing intestinal problems. It contains malt, and prevents the formation of hairballs in the cats stomach. Mineral oils help to maintain a healthy intestinal flora. This in return helps to ensure improved digestion, a healthy immune system and a decrease of harmful bacteria.

DOSAGE AND ADMINISTRATION: give 2-3ml of Hairball Free for 3-4 times a day, between the meals, either from your finger or placing on front paws where it can be licked or put on root of the tongue. To prevent hairballs give 3ml of Hairball FREE 1-2 times a week.

PRESENTATION: 20ml, 60ml

Lysine-VP

Lysine supplement for cats, with Echinacea EO

INGREDIENTS: Lysine, vitamins A, D, E, C, K, Zn, malt extract, herbal essential oils

PROPERTIES OF THE INGREDIENTS: Herpesvirus infections in cats can be a big problem. Once a cat is infected, the virus is always there, waiting for a chance to cause problems. Lysine VP meets the needs of a Lysine supplement which is a wellknown help in cat herpes virus treatment, both for respiratory and eye symptoms. This gel can be ingested by a cat for systemic treatment and protection.

DOSAGE AND ADMINISTRATION: cat: 1-2ml twice per day, kitten: 1ml twice per day

PRESENTATION: 20ml, 60ml

SuperCat-VP

Vitamin, amino acids and mineral supplement for cats

INGREDIENTS: Vitamins, minerals and proteins easily assimilated with taurine

PROPERTIES OF THE INGREDIENTS: SuperCat paste is a vitamin-rich supplementary feed with minerals and easily digestible protein content. It secures growth, beautiful coat, normal development of bones and teeth, promotes fat metabolism and the function of the skin and mucous membrane, increases the defense against infection. Prevents premature keratinization of the upper layers of the skin and thus promotes hair growth.

DOSAGE AND ADMINISTRATION: Adult cat: 3-5ml per day, kitten: 2ml twice per day

PRESENTATION: 20ml, 60ml

skin and care

OtiHerbal

Gel for hygiene and treatment of ear canal

COMPOSITION: rosemary, diviz, oregano, garlic, cantarion, calendula, tea tree, apple cider vinegar, coconut oil

PROPERTY OF INGREDIENTS: Otiherbal is intended for cleaning and care of the ear canal. It is very convenient to use because it is gel-shaped, and by itself being retained in the ear canal has a beneficial effect on all changes, even the most persistent ones. It changes the pH of the skin which adversely affects the development of the Pseudomonas species. It removes dirt from the outer ear, ear wax and secretion, reduces the odor caused by ear infection and promotes epithelialization.

APPLICATION: ear canal care: once a week, and in dogs prone to chronic otitis 2-3 times a week. For ear infection, repeat treatment 2-3 times daily for 2 weeks for milder and 3-4 weeks for severe inflammation.

PRESENTATION: tube 20ml

DentalHerbaFresh

neutralizes bad breath, refreshes the mouth, nourishes the gums and prevents calculus

COMPOSITION: Essential oils of mint, eucalyptus, cinnamon and cloves, baking soda

ACTION: Dental HerbaFresh is a natural product for the treatment of the oral cavity.

APPLICATION: Spray several times a day on the gums and mouth with a toothbrush or fingers to rub on the gums and teeth of a dog or cat. Half an hour before and after the application, withhold food and water from your pet for Dental HerbaFresh to work faster and more efficiently. Effervescent tablets dissolve in 0.5L drinking water.

PRESENTATION:

Spray: 100ml Gel: 20ml, 60ml, 100ml
Effervescent tablets: single pack

CrystalEyes

Under eye skin gel

COMPOSITION: Essential oils of tea tree, coconut and olive oil.

ACTION: Cleaning and care of the skin and hair in the area of the eye that is damaged and altered. Changes are most often caused by inflammation of the eyelashes and eyelid, allergic conditions, etc.

APPLICATION: Squeeze a few drops of gel onto a piece of cotton wool and apply on the damaged skin, taking care that the grease does not enter the eye. Massage briefly and allow the gel to act. Repeat the procedure 3-5 times a day for 5-7 days, after which healing should occur. If there is no visible improvement after 7 days, consult a veterinarian.

PRESENTATION: 20ml

NoBite

against biting and licking

INGREDIENTS: Denatonium benzoate

PROPERTIES OF THE INGREDIENTS:

The bitter taste of the product discourages animals from biting, chewing as well as licking bandages and skin wounds and lesions. In dogs and cats product can be used anti biting furniture and other environmental objects- product has no color or odor.

DOSAGE AND ADMINISTRATION: Spray the desired location, by pressing the sprayer 2-3 times. The process can be repeated daily as long as needed.

PRESENTATION: 50ml

SkinRelax

*Natural
anti itching spray-solution*

INGREDIENTS: Essential oils of Lavandula angustifolia, Origanum vulgare, Origanum majorana, Mentha piperita, Syzygium aromaticum, Melaleuca alternifolia.

PROPERTIES OF THE INGREDIENTS: SkinRelax as natural product has beneficial calming effect in the most persistent itching of different etiologies. SkinRelax has antihistaminic, antibacterial, antiviral and antifungal properties, which provides a comprehensive application especially for itching of unknown origin. SkinRelax is intended for the treatment of itching.

DOSAGE AND ADMINISTRATION:

Itchy skin area should be sprayed 3-4 times on itching place. Repeat 2 to 3 times per day. You can use NoBite product to prevent biting and licking the treated area.

PRESENTATION: 100ml

WoundCare

*Skin care
natural spray solution*

INGREDIENTS:

Essential oils of Azadirachta indica, Cymbopogon winterianus, Myristica fragrans, Melaleuca alternifolia, Eugenia caryophyllus, Oleum sesami, Oleum olivae, Allium Sativum

PROPERTIES OF THE INGREDIENTS:

WoundCare acts against bacteria viruses, fungi and flea larvae. Natural WoundCare is intended for the treatment of skin diseases, cuts or infected wounds. The product is also effective in treating burns.

TARGET SPECIES: All kind of animals

DOSAGE AND ADMINISTRATION:

Spray 2-3 times a day until wound healing is completed. Do not use on bleeding wounds.

PRESENTATION: 100ml

EctoGuard Spot on

Natural repellent against fleas and ticks

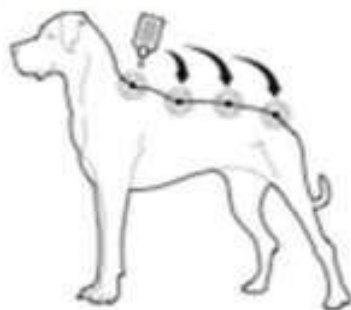

INGREDIENTS: EO of Neem, Decanoic acid, Lavander EO, Citronella EO

PROPERTIES OF THE INGREDIENTS:

The extract of the neem-oil possesses extremely repellent property that repels insects. Decanoic acid, has a strong repellent effect too. In addition to the effects on insects these natural substances have other medicinal properties, bactericidal effect and nourish the skin (lavender). Citronella has a very pleasant smell and it is very good repellent for all kind of mosquitos. The combination of four active substances consist of very different classes of compounds produces significant synergies which extends the effect.

PRESENTATION:

- tube for cats-1.5 ml,
- tube 2ml for dogs up to 15kg BW,
- tube 4ml for dogs over 15kg BW, - tube 6ml for dogs over 30kg BW

Repeat treatment evry 4 weeks.
