

# FERTI

## Feed additives for animals in oral form

### COMPOSITION:

#### Vitamins:

- Vitamin C
- Vitamin E
- L-Carnitine
- Folic acid
- Biotin

#### Trace elements:

- Selenium
- Zinc

#### Preservatives and solvents:

- Purified water

### INDICATIONS:

The use of Ferti products improves the function of the reproductive organs of both male and female individuals. In breeders hens the egg production is stimulated and their number increases. In male individuals of breeders flock, spermatogenesis is promoted, the number, motility of spermatozooids is increased, and their life in the reproductive organs is prolonged. All this together gives more fertilized eggs, a more uniform and healthier flock. Ferti helps the animals increase their genetic potential, produce as many eggs as possible and prolong their exploitation period.

**TARGET SPECIES:** Breeders and layers

### DOSAGE AND ADMINISTRATION:

Oral administration by dissolution in drinking water, dose is 1L per 1000L of water (5000 individuals). The product is used earliest at 17th week of age because it does not lead to early administration. Use the preparation for at least 2 weeks to achieve results and, if necessary, longer.

**CONTRAINDICATIONS:** None described.

**ADVERSE REACTION:** None.

**WITHDRAWAL PERIOD:** None.

**SPECIAL PRECAUTIONS:** Store protected from humidity and light, on a temperature up to 25°C. Keep away from children. Store in closed containers.

**WAY OF ISSUE:** Without a prescription.

**PRESENTATIONS:** 1L, 5L

**ANIMAL CONTROL FACILITY NUMBER:** α RS-31029

**PRODUCER NAME AND HEADQUATERS:** Vetplanet doo,Vrsac, Vojvodjanskih brigada 16,Serbia
