

# Dental HerbaFresh Gel

Gel for external use

## COMPOSITION:

Natural components:

- Nana oil
- Eucalyptus oil
- Clove oil
- Cinnamon oil

Preservatives and solvents:

- Baking soda
- Xanthan gum
- Purified water

Dental HerbaFresh gel is natural product for mouth treatment. It neutralizing bad smell in dogs and cats, decrease creation of plaque and helps of healing dental gums.

Essential oils give freshness of breath, acts against bacteria and all inflammation process in mouth. It also prevents tooth decay, neutralizing bad breath and maintain the tongue, teeth, gums and mucous in healthy condition.

Baking soda has a mild abrasive role which helps remove tartar, cleans, deodorizes and polishes teeth. Dental HerbaFresh gel has an alkaline pH, which is beneficial to increase the pH in the mouth and thus creating an unfavorable environment for bacterial growth.

## USE:

Squeeze the gel to your finger or toothbrush and rub on teeth and gums of the animal several times a day. Half an hour before and after application, withhold food and water for your pet to make Dental HerbaFresh gel faster and more effective.
