

EctoGuard

Spot-on for external use

COMPOSITION:

Natural components:

- Neem essential oil
- Decanoic acid (from coconut oil)
- Lavender essential oil
- Citronella essential oil

Preservatives and solvents:

- Potassium sorbet
- Isopropyl alcohol
- Isopropyl myristate

USE:

EctoGuard spot-on- natural product based on essential oils protects your pet from fleas, ticks and lice in the period up to 4 weeks. Thanks to its unique waterproof formula provides protection after the bath or short rain. It is very efficient, beneficial for the skin and fur, pleasant fragrance.

Based on the research of efficiency and toxicological profile of the active substances we have formulated a unique product that contains essential oils of neem or margosa tree, lavender, citronella, and decanoic acid. The extract of the neem-oil possesses extremely repellent property that repels insects. Decanoic acid, as a second active ingredient is obtained from coconut oil by hydrolysis. It has a strong repellent effect too. In addition to the effects on insects these natural substances have other medicinal properties, bactericidal effect and nourish the skin (lavender). Citronella has a very pleasant smell and it is a very good repellent for all kinds of mosquitos. The combination of four active substances consist of very different classes of compounds produces significant synergies which extends the effect.

Repellents such as EctoGuard not kill the parasites, but keep them away from the host, or if the parasite is already found on the host, force it to leave the skin in a very short time, because the host skin rejects it. Repellent effect is so powerful that the parasites do not even bite a host.

In addition to repellent effects on insects, these natural substances have other features, they are bactericidal and beneficial for hair and skin.

APPLICATIONS:

Unscrew the cap from the tube, disclose the hair and apply the entire contents drop by drop on the entire length of the animal back - approximately every 3 cm - from the tail to the neck, directly on the skin. Do not apply on the fur and do not rub. After application, for better effect, the animal needs to be well combed. The time it takes for ticks and fleas to leave the fur and hair of the animal is 24 hours. Apply again EctoGuard spot-on after 4 weeks in order to extend protection.
