

PetCalm spray and diffuser

Solution for external use

NATURAL COMPONENTS:

- Valerian
- Vetiver
- Sage
- Basil
- Lemon balm
- Lavender essential oil

Preservatives and solvents:

- Glycerin
- Purified water

USE:

PetCalm with its carefully selected essential oils acts against stress and anxiety. Animals are relaxed but not sedated. By increasing GABA (gamma-amino butyric acid), natural chemicals produced in the brain, the state of relaxation is achieved. A soothing message is transmitted from nerve to nerve.

TARGET SPECIES: Dogs, cats, rabbits, birds and horses

DOSAGE:

Shake well before use.

Kind and size of animal	Package 300ml	Package of 50ml
Small dogs, cats, rabbits, birds	3-4	10-15
Middle size and big dogs	5-7	20-28
Horses	7-10	

PetCalm spray should be sprayed on the hand or glove and rubbed the fur or sprayed directly on the animals hair in the top part of the chest, nose or under the chin, but it should be avoided direct spraying in the nasal cavity, eyes and ears.

For small dogs and cats one, for treatment is enough to squirt 3-4 times. For bigger dogs its recommended to squirt 5-7 times. Calming and de-stress effect is expected after 10-20minutes.

The product is PH neutral, and has a beneficial effect on the skin and fur, including very pleasant smell. There are no any adverse reactions. PetCalm acts immediately and can be applied at intervals of 2 to 6 hours (individual tolerability), or more frequently in the case of strong need for calming. PetCalm spray is commonly used in all stressful situations: fireworks, thunder, travel, alone in the house, change of domicile, noise, visits to the vet or a hairdresser, as well as in the situation of behavior change (especially aggression), persistent scratching and biting the environment, reduced appetite. Veterinarians should spray the mat for animals about ten minutes before the examination in order to facilitate it. Dog trainers can use this product to make training easier and faster. PetCalm spray can be sprayed onto the mat and animals, car seats, cover equipment or boxes for transport.

Birds, rabbits: spray few times patch and cover the cage for 20 minutes. You can also spray litter for few times.

Horses: you can spray gloves and make massage to nose and cheeks or spray on neck and chest for many times.

Pet Calm electric diffuser can be used continuously; a bottle of 45 ml lasts up to 8 weeks and covers an area of 50 m². Electric diffuser should be plugged in when your pet is home alone, on nearest plug in to your pet. Essential oils solution released slowly in small concentrations and ensures a constant dose for your pet. The pet becomes attentive and receptive.

Use of electric diffuser:

1. Unscrew the cap from the bottle
2. Place the wick (filter wand) into the bottle - until the end
3. Screw bottle on the underside of the electric diffuser
4. Turn on the power (if the diffuser has a switch, press to ON)
