

Probiotic VP

COMPOSITION:

Bifidobacterium, Lactobacillus genus and inulin (FOS)

USAGE:

Probiotics are living microorganisms that, when introduced into the digestive system, have beneficial effects on the host animal by altering the gastrointestinal flora. The effect on the gastrointestinal tract is that the benefits of probiotics for dogs and cats include maintaining the gut microbiota in balance and boosting a healthy population of microorganisms. In this regard, they also lead to the consequent prevention of diarrhea associated with stress, infectious causes or antibiotics, and in addition have an effect on chronic intestinal tract diseases.

Immunostimulation of probiotics is expressed through a direct effect on the lymphoid tissue of the intestine and immunoglobulins.
