- Palm tree oil
- Line oil

Vitamins:

- Vitamin A
- Vitamin D3
- Vitamin E
- Vitamin C
- Vitamin K
- Choline chloride

Nutritional supplements:

- Sucrose
- Vanilla extract

Preservatives and solvents:

- Glycerin
- Xanthan gum
- Purified water

USE:

VitalPlus gel should be administered when the animals are weak, exhausted or not able to suckle enough colostrum (neonatal animals).

Animals that do not consume food because of non-vitality and hypothermia by taking VitalPlus will receive the required energy through the medium chain fatty acids contents in palm, sesame and line oil. These oils are very rich in omega 3, 6, 9 essential fatty acids and antioxidants. These entire components are essential for growth of the organism, and ensure proper animal health.

Vitamin complex A, D3, E, C and K are added to Vital plus to enhance and facilitate of the animal growth and development, especially in the conditions of illness and convalescence. They are very important to ensure the immunity creation and overall resistance of the organism.

Sucrose is added to complete the energy level.

Product should be administered also to animals after surgery, or any other situation that cannot eat, or food intake is reduced or prevented.
