

# FirstGel

gel supplement with probiotic and prebiotic for one day calves for head start and digestive decrease occur of diarrhea and energy booster

FirstGel is the first choice for farmers who want to give their newborn calves a head start.

## *First Gel is effective*

It is made from concentrated vitamins A, D3, E, C, and K, with Omega 3, 6, 9 fatty acids, probiotics *Bacillus Lactobacillus*, *Saccharomyces* and *Streptococcus* with inulin as prebiotic - gets the newborn up and nursing faster, giving it the head start it needs.

## *Products for healthy, high-performance calves*

They improve organism immunity to bacterial infections and favour colonisation of positive bacterial flora. For better result repeat application in next 6-12 hours.

## *Older Calves*

Fighting against diarrhea and stress as cause of many disorders in older calves best solution is First Gel - application 50ml, twice a day, 3-5 days.

## *FirstGel is convenient and easy to use*

FirstGel comes in an easy to use 50 mL tube. Just put the tip of the dosing syringe on the back of the calf's tongue and push the plunger slowly.

## *FirstGel is the right dosage*

FirstGel concentrated formulation, in a 50 ml dosage size, helps newborn calves get started without filling them up so they are hungry for their first feeding of colostrum. Decrease occurrence of diarrhea and gives a lot of energy to newborn calves.
