Energy release

## Metabolic Plus gel

- Energy booster
- INGREDIENTS: Vitamins, essential amino acids, electrolytes, glucose
- DESCRIPTION: Supplement for sport horses that have to deliver brief and powerful burst of energy for top performances. Metabolic plus is a mix of high-quality electrolytes, vitamins, amino acids and sugars important for the body when engaging in sports. Metabolic plus gel can be used just before the effort (maximum half an hour before the effort). In addition Metabolic plus provides minerals, vitamins and substrates important for muscular activity. It is also supplied after competition or strenuous effort for a quick recuperation.
- DOSAGE: Metabolic plus is usually given before or during an event or stressful situation. Administrate gel into the mouth of the animal once a day in dose 100ml per animal. In case of physical exertion, training, and before races as energy booster twice a day.
- PACKAGING: 100ml

# Anti inflammatory herbal pain killer

- Aspiveto gel

- Herbal aspirin

- INGREDIENTS: Wintergreen
- DESCRIPTION: It contains about 98% methyl salicylate, which is a natural agent with antipyretic, analgesic and anti-inflammatory effects. It helps with all inflammatory processes, by reducing the symptoms of inflammation, edema and redness, reduces pain, and facilitates joint movements. It is recommended for acute and chronic painful conditions, arthritis and tendinitis, fever.
- DOSAGE: By squeezing the syringe into the mouth of the animal in the required daily doses as
  - needed or 2-3 times in chronic cases:
  - Horses: 10ml / 30kg BW
- PACKAGING: 20ml, 100ml

# Mobility support

## Hip&JointStar Gel

- Supplement for articulations
- **INGREDIENTS:** Glucosamine, chondroitin sulfate, methylsulfonyl methylene (MSM), hyaluronic acid, vitamin C, manganese, turmeric, yeast, white willow bark
- **DESCRIPTION:** Hip & joint star gel is an advanced formula that protects joint by promoting healthy joint tissue, normal function and flexibility. The active ingredients are natural compounds that provide the strong support needed to maintain healthy cartilage, naturally lubricate the joints and help cushion the impact. Promotes normal physical performance of healthy connective tissue and cartilage.
- **DOSAGE:** Horses: By squeezing the contents of the syringe into the corner of the lips in the following doses:
- 15ml per day at 200kg BW. It can be given over a long period of time. In severe cases, the daily dose may be repeated at 12-hour intervals.

- INGREDIENTS: Vitamins, dextrose, sodium, potassium, magnesium, calcium
- DESCRIPTION: Oligobalance gel is used to rehydrate the body. Supplement is a source of highly bioavailable and easily digestible nutrients, which help to establish the physiological balance of water and electrolytes in the body of animals. Oligobalance gel is recommended in all situations when dehydration and loss of electrolytes can occur, especially during the recovery period, after diarrhea and vomiting.
- DOSAGE: By squeezing the gel from the syringe into the corner of the lips in the recommended daily doses twice a day: Horses 100ml
- Repeat the treatment as many times as necessary.
- PACKAGING:100ml

# Liver tonic

## HepaRen detox gel

- Liver and kidney supplement
- **INGREDIENTS:** Sorbitol, choline chloride, betaine, lysine, L-carnitine. Herbal extracts: artichoke, rosemary, parsley, wormwood, fenugreek
- **DESCRIPTION:** Heparen detox gel has a strong effect on metabolism and immunity, increases appetite and food intake. A great advantage is the maintenance of stable function of parenchymal organs, such as the liver and kidneys, which is especially important in poisoning, which is common in practice. It is also recommended when water intake is reduced, prevents the accumulation of fat. It has a positive effect on the secretory function of the pancreas, as well as on body weight, fetal development, growth and development.
- **DOSAGE** It is applied for 5-10 consecutive days.
- Horses: 50 to 80 ml per day,
- Young horses : 30ml per day.
- **PACKAGING:** 100ml

# Probiotic & gastric health

- **MultiPower biotic gel**

- Multivitamin complex with probiotics
- **INGREDIENTS:** Vitamins, amino acids, trace elements, probiotics
- **DESCRIPTION:** Multipowerbiotic gel is used in all conditions in which it is necessary to strengthen the immunity: in the period of acute and chronic diseases, recovery, etc. MultiPowerbiotic gel is recommended to be given when the decline of immunity is expected due to stressful situations, it helps strengthen the immune system, during and after bacterial and viral infections, as a synergistic support for antibiotic therapy, after antiparasitic therapies. MultiPowerbiotic gel relieves symptoms of stress caused by vaccination, disease, high humidity, high temperature, competition or transportation. It also has a beneficial effect on skin and fur.
- **DOSAGE:** Horses: By squeezing the contents of the syringe into the corner of the lips in the following doses: 100-150 ml per day, 3-5 days.
- Use as long as considered necessary.
- **PACKAGING:** 100ml

# Calming

- **PetCalm**
- **Calming natural solution**
  - **INGREDIENTS:** Valerian, vetiver, sage, basil, lemon balm, lavender
  - PetCalm with its carefully selected essential oils acts against stress and anxiety.
  - Animals are relaxed and de-stressed.
  - **DOSAGE AND ADMINISTRATION:** Shake well before use.
  - You only need a 10-15 of sprays and after 20 minutes calming effect will start. This will last between 2 and 6 hours depending on the individual horse. You can repeat same procedure as much as you need.
  - Spray on a damp cloth glove or fingers and gently rub around muzzles of nose, neck and chest for many times. This helps with scent swapping as well as calming, which in turn helps speed up the bonding process.
  - As a rule, best not to spray directly on a horse. This avoids any association of the spray with the stressful situation. When out walking or training an anxious horse, spray a little on a bandana or spray a little on a damp cloth, or boots. You can even spray a little on your trouser leg and bring the horse to heel to take in the actives! You can spray on cloth and hang near hay net in stable or horsebox. PetCalm spray is commonly used in all stressful situations: fireworks, thunder, travel, change of stable, noise, visits to the vet as well as in the situation of behavior change (especially aggression), PetCalm spray can be sprayed on the horse's transport vehicle.
  - **PRESENTATIONS:** 300 ml

- Fireworks**
- Thunders**
- Traveling**
- Racing**
- At veterinary**
- Training**
- Any stress**

# Respiratory supplement

- **RespiGuard gel**

- **Gel supplement for respiratory problems**

- **INGREDIENTS:** Eucalyptus, thyme, bitter gourd, mullein, echinacea, marshmallow, vitamin C
- **DESCRIPTION:** RespiGuard gel is a preparation that is recommended for the prevention and help in the treatment of respiratory infections, various etiologies. RespiGuard gel dilates the respiratory tract and thus facilitates breathing. The preparation has a secretolytic effect, which enables easier release of the products of infection from the respiratory tract. In addition, it has a pronounced antibacterial effect.
- **DOSAGE:** By squeezing the contents of the syringe into the corner of the lips in the following doses:
  - Horses: 60ml, 2 times a day, 7-10 consecutive days
  - Youngl: 20ml, 2 times a day, 7-10 consecutive days
- **PACKAGING:** 100ml

# Energy booster

- VitalPlus gel

- Energy booster
- INGREDIENTS: Sesame oil, line oil, palm oil, vitamins A,D,E,C,K, saccharide
- DESCRIPTION: VitalPlus should be used when the animals are weak, exhausted or in newborn animals that are not able to suck enough colostrum. Animals that do not consume food due to avitality and hypothermia, by taking the preparation VitalPlus, get the necessary energy through medium-chain fatty acids, and vitamins provide the creation of immunity and general resistance of the organism. The product should also be given to animals after surgery or any other situation that the animal cannot eat or food intake is reduced or prevented.
- DOSAGE: Horses: By squeezing the syringe into the mouth of the animal in the required daily doses: 10ml/40kg BW. The minimum dose per animal is 10ml. Repeat the treatment until a satisfactory result. It is recommended to use for up to 7 days.
