- Duration of treatment up to 6 months, or until symptoms disappear.
- **PACKAGING: 100ml, 250ml**

Ferti M

Male fertilization supplement

- **INGREDIENTS:** COMPOSITION: Vitamin C, L Carnitine, Vitamin E, Biotin, Zn, Se
- **PROPERTY OF INGREDIENTS:** The use of Ferti M has a major impact on spermatogenesis. After few weeks of use, the animals generate more sperm. Ferti M affects in strength, mobility and prolongation of vitality in the male reproductive organs. All together, this effect results in an increase in the number of newborn vital individuals.
- **DOSAGE:** 3-4 weeks, or extended if it is necessary.
small male dogs 1 tbl.,
medium male dogs 2 tbl.,
large male dogs 3 tbl. per day
- **PRESENTATION:** 70 tablets

Ferti FM

Female fertilization supplement

- **COMPOSITION:** Vitamin C, L Carnitine, Vitamin E, Biotin, Folic Acid, Se
- **PROPERTY OF INGREDIENTS:** The use of Ferti FM results in the optimal regeneration of the reproductive organs, which must be ready for rapid entry into new gravity. It improves egg production, increases their number and conception. Ferti FM encourages the realization of genetic potential, increases the number of healthy and vital newborns and litter uniformity.
- **DOSAGE:** 4-6 weeks
small dogs 1 tbl.,
medium dogs 2 tbl.,
large dogs 3 tbl. per day
- **PRESENTATION:** 70 tablets

Methacid

Prevent the formation of certain types of stone formations and reduce the smell of urine

- **INGREDIENTS:** Methionine

DESCRIPTION: Methionine is an essential amino acid, used in protein biosynthesis. Since the body is not able to produce methionine, it is necessary to meet the requirements in food. Adequate amounts of methionine allow for balanced liver function while methionine deficiency can lead to fatty liver degeneration.

Methionine is commonly used to acidify urine and is not recommended for kittens or animals with kidney problems, pancreatic disease, or liver failure. Acidification of urine can help prevent the formation of certain types of stone formations and reduce the smell of urine.

- **DOSAGE:** Dogs :1 tablet per 10kg TM per day
It can be given over a long period

- **PACKAGING:** 70 tablets

Complex B forte gel

Vitamins B complex in gel

- **INGREDIENTS:** B complex vitamins

PROPERTIES OF THE INGREDIENTS: The importance of vitamin B complex is reflected in the many roles they play in the body. Any condition that increases energy needs, such as stress, infections, high productivity, requires additional intake of this complex. They participate in cellular respiration, the formation of erythrocytes and antibodies, and are necessary for the creation of a good immune response. They play an important role in ridding the body of toxins and harmful substances, because they participate in their metabolism in the liver. They stimulate liver regeneration and prevent fatty degeneration. These vitamins have a role in the prevention of sterility, participate in the synthesis of hormones, some neurotransmitters and are important for maintaining the healthy function of the nervous system.

- Complex B forte helps with nervous system dysfunction, it is recommended for use in antiparasitic and antibiotic therapy, vaccination.

- **DOSAGE AND ADMINISTRATION:**

daily doses for 3-5 days:

Small dogs: 1-2ml

Medium dogs: 4-5ml

Large dogs: 6-9ml

- **PACKAGING:** 20ml, 60ml

VitalPlus gel

Energy booster

- **INGREDIENTS:** Coconut oil, line oil, palm oil, vitamins A,D,E,C,K, saccharide
- **DESCRIPTION:** VitalPlus should be used when the animals are weak, exhausted or in newborn animals that are not able to suck enough colostrum. Animals that do not consume food due to avitality and hypothermia, by taking the preparation VitalPlus, get the necessary energy through medium-chain fatty acids, and vitamins provide the creation of immunity and general resistance of the organism.
