NaturaHealing

ABOUT COMPANY

VetPlanet doo is specialized in the production and marketing of veterinary supplements. HACCP certified production and portfolio includes a wide range of unique animal supplements and complementary products that promote a health and animal welfare. A special line of our products, which are new in veterinary medicine in this area, consist of supplement enriched with plants extracts and essential oils. Our company aligns market needs with latest research and creates new production formulations, thanks to intensive cooperation with veterinary faculties and institutes in the country and region, as well as collaboration with colleagues from veterinary field.

VISION OF THE COMPANY

The company's goal is sustainable growth, sustained long-term development and active participation in rising the competitiveness of farmers. The company is export -oriented, with the ambition to play role in world market.

FirstGel *chicken*

for ideal fresh start

What is FirstGel chicken :

a unique formulation developed on the basis of the nutritional needs of a young poultry that ensures rapid hydration, energy, early intestinal first days of life, but also to the older animals of all races.

Formulation:

dry green powder , easy and quick to dissolve in tap water , in 10-15 minutes becomes gel form which is easy to administrate in incubators and farms. Powder from box (600g) dissolved in 10L of tap water is intended for 10,000 of day-old chicks or 450kg of BW adult poultry.

**vitamins
amino-acids
electrolytes
probiotics
betain
herbals**

BENEFITS:

- **Helps prevent dehydration**
- **Helps to overcome service stress**
- **Provides a valuable source of nutrients**
- **Encourages early food intake**
- **Stimulates the development of the digestive system**
- **Great fresh start of breeding**
- **Top production capabilities**
- **Ideal for use in livestock delivery systems**
- **Excellent return on investment**

presentation: 600g, 120g, 12g

BioDiar

Prevention and stopping diarrhea

INGREDIENTS: chestnut, carob, oregano, thymus, clove

PROPERTIES OF THE INGREDIENTS: formulation with a carefully selected and balanced mixture of plants alleviating the symptoms of the infection of the gastrointestinal tract, leads to stopping of diarrhea. Biodiar relieves and stops symptoms of digestive disorders and infections, increasing appetite, conversion and feed intake, stimulating immunity and have high influence on healthy status of animal .Biodiar is very efficacy alternative to antibiotics ,without resistance to microorganism. It can be used during all period of breeding.

DOSAGE: Oral solution: poultry: 1 liter per 1000 liters of drinking water

Premix: via feed, 2 kg per 1 ton of ready fooder mixture. If all animals on farm are using Biodiar for 4 weeks, dose can be decrease every week by 100g, until to 1.3kg/T feed.

PRESENTATION:

oral solution: 100ml, 1L, 5L

premix: 100g, 1kg, 10kg

BioDiar Plus - new formula with prebiotic and butyrates!

OregoMix

general phytobiotic

INGREDIENTS: mix of origano, thymus , salvia, echinacea, garlic, rosemary

PROPERTIES OF THE INGREDIENTS: It is highly effective mixture against most common microorganism which causes non-specific enteritis, gastro-intestinal infections and diarrhea, illness of respiratory and urogenital tract. Improve growth, appetite enhancement, increases the utilization of feed, stimulator of the immune system, reduce the level of ammonia, has strong antioxidant and anti parasitic effect.

DOSAGE:		Drinking water		Feed	
		Prevention	Treatment	Prevention	Treatment
OregoMix oral solution	poultry, birds	700 ml/1000 l	1000 ml/1000 l	-	-
	pork	800 ml/1000 l	1000 ml/1000 l	-	-
	calf, sheep, goat	3 ml/10 kg live weight/day	5 ml/10 kg live weight/day	-	-
OregoMix herbal premix	poultry, birds	-	-	700 g/1000 kg	1000 g/1000 kg
	pork	-	-	800 g/1000 kg	1000 g/1000 kg
	calf, sheep, goat	-	-	3 g/10 kg live weight/day	5 g/10 kg live weight/day

For the prevention and increase the yield: use treatment dose of 7 days (eg. Poultry after hatching), after delivery animals, the purchase of new animals, fattening phase change, ... and then use a preventive dose every 2nd week, or once a week dose of treatment. 7 days before and 7 after changing food, use a prevention dose (14 days). If the symptoms of the disease appear repeat the treatment.

PRESENTATION: oral solution: 1L, 5L

premix: 100g, 1kg, 10kg

BioDiarPlus

Phytobiotic in the prevention of swine enteral diseases

oregano

Carvacrol and thymol both have strong antibacterial and antifungus effect. Kill nematodes. Good antioxidant, can stimulate digestion.

cinnamon

Has more antibacterial effect inhibitory effect on parasite. Improve feed intake and promote digestion.

eucalyptus

Cineol 1.8, compound of Eucalyptus has very strong antibacterial effect

sweet chestnut

Tannins have the ability to bind proteins and thereby bind toxins and bacteria in the gastrointestinal tract. React with the cell wall of bacteria, damaging it and prevent bacterial reproduction.

Maximal dose : 2kg/1 T feed

Prophylactic dose : 1kg/1 T feed

Packaging : 10kg

your partner
for succes

main benefits

1. Anti-bacteria: The essential oil molecules can destroy the cell wall and cell membrane, block the duplication of DNA by ion permeability method, which can achieve the purpose of anti bacteria.

The product has no drug resistance, no residue and posses broad-spectrum anti-bacterial activity.

2. Attract feeding: Mild spicy flavor of product can cover up the bad smell, promote the ingestion of animal, relieve stress. Better attractive effects will be obtained, when the product be common used in all animals category .

3. Promote growth: The product can stimulate the secretion of endogenous digestive juices, increase digestibility of nutrients, improve intestinal health, promote the absorption of nutrients, promote blood circulation and improve the transport and utilization of nutrients.

4. Helps to strengthen the natural body defenses by increasing immune response.

RespiGuard

Respiratory phitobiotic

INGREDIENTS: garlic, eucalyptus, thymus vulgaris, oregano, peppermint

PROPERTIES: Mint oil stimulates the respiratory tract and nervous system. Eucalyptus oil restores natural movements of the epithelium and it supports bronchial secretion clearance. Menthol works anesthetically and it reduces mucosal irritation. Garlic has antibacterial, antifungal, antiparasitic, antiviral and antiprotozoal effect and immunostimulant properties. Oregano has disinfectant, anti-inflammatory and antispasmodic properties. Thyme has antibacterial, antidiarrheal and anti-inflammatory effect and helps for easier breathing.

DOSAGE: premix: 1kg per 1000 kg per 1 ton of feed, 7-10 days.
Preventive: 7-10 days before expecting respiratory problems.
For complete protection, treatment duration (5-7 days), maybe repeated every three weeks.
Oral solution: Poultry: 1L per 2000 l of drinking water or 1L per 1 ton of feed, 7-10 days.

For complete protection, treatment duration (7-10 days), maybe repeated every three weeks.

PRESENTATION: oral solution: 1L, 5L

premix: 100g, 1kg, 10kg

RespiFresh

Respiratory supplement and air freshener

INGREDIENTS: eucalyptus, peppermint, thymus

PROPERTIES OF THE INGREDIENTS: herbal product which protects the upper airways. It improves the blood supply of the cuticle and stimulates its regeneration. It also has an effect on the mucous membranes of the nose, sinuses and trachea resulting in their clearance via expectorant response. During periods of disadvantageous environmental conditions (high temperature, high pollution, high concentration of harmful gases e.g. ammonia, hydrogen sulphide - as a means of prevention). RespiFresh reduce the undesirable effects of post-vaccination reaction, diminish contamination of drinking water, and alleviate heat stress, increase thermal sensation of freshness.

DOSAGE AND ADMINISTRATION:

Systematic use: Poultry: 1L per 5000 l of drinking water, 3-4 days.

Pigeons: 1ml per 5 L of drinking water, 3-4 days.

Application by spraying in object:

Birds/200ml/10L water, what is equivalent dose for 20.000 birds, 2-4 times a day.

PRESENTATION: 1L, 5L

BetaVit C mint

Contains betaine and vitamin C with the high concentrations of essential oil Peppermint

Anti heat stress supplement

INGREDIENTS: betaine, vitamin C, peppermint

PROPERTIES OF THE INGREDIENTS: The selected combination of ingredients guarantee success in overcoming the problems that occur as a result of stress, particularly stress caused by high temperatures, which results in heat stroke. Betaine has a role of an osmotic agent that is used by the cells in order to protect from osmotic stress, dehydration or high temperatures. Vitamin C is the strongest antioxidant among vitamins and has many roles in the organism. Stress, greater physical labour, contagious diseases, gestation and lactation increase the need of this vitamin. Vitamin C successfully helps in different diseases, hemorrhagic diathesis and during convalescence. The essential oil of mint has analgesic, antiseptic, antibacterial and antiviral effect. Apart its medicinal effects, provides a refreshing taste, acts relaxing and gives a feeling of cooling.

DOSAGE: For oral administration via drinking water in these doses: poultry: 1 ml per 1 liter of drinking water

PRESENTATION: 1L, 5L

AspiVeto

Herbal salicylic acid

Helping in prevention of heat stress, supplementation in vaccination period, reduce pain and decrease fever

INGREDIENTS: wintergreen, willow bark, filipendula

PROPERTIES OF THE INGREDIENTS: Apiveto is a combination of natural salicylates isolated from herbs that contain a lot of salicylic acid. Natural salicylates act anti-inflammatory, analgesic and depress the aggregation of thrombocytes. Further they also dilute the blood showing preventive activity against malfunctions of the circulatory system. Natural salicylates incorporated in the formula of AspiVeto are the best solution for supporting treatment of motor skills disorders resulting from the joints inflammatory condition - in case of poor general condition, particularly in case of the young animals and final phase of their fattening - for the treatment of blood vessels fragility - for the treatment of cardiovascular system disorders resulting from the quick growth tempo

DOSAGE: oral solution: poultry: 1 L per 1000 L (1 ml per 1 L) of drinking water in 10-15 days

Premix: via feed as follow: 4 kg per 1 ton of feed 7-10 days.

PRESENTATIONS: oral solution: 100ml 1L, 5L

premix: 1kg, 5kg

CocciProtect

Herbal coccidiostatic

INGREDIENTS: garlic, origano, thymus, sage, echinacea, rosemary, junipera, siberian fir

PROPERTIES OF THE INGREDIENTS:

- prevention of coccidiosis
- improve low breeding efficiency ratio
- as support in treating coccidiosis
- exhibits bacteriostatic and immunostimulatory effect
- is a rich source of antioxidants
- improves feed utilisation and enhances weight gain
- increases the secretion of bile
- increases the enzymatic activity of the intestinal mucosa
- relieves inflammation of intestines
- liquid form ensures quick and easy technological integration of the product with animal feed
- improves the quality of meat and eggs
- is suitable for all species and groups of poultry
- It may be used at any time during production, requires no withdrawal period.

DOSAGE: Oral solution: If there are possibilities, best way is to divide oral administration daily dose in 12h. Poultry, turkey: 1ml/1L daily
Premix: every day mix in feed, dose of 1kg/1T feed.

essential oils complex

PRESENTATION:

oral solution: 1L, 5L
premix: 100g, 1kg, 10kg

Herbal supplement against Histomoniasis

INGREDIENTS: Cinnamaldehyde, carvacrol, eugenol, eucalyptol, nerolidol, Vitamin A, Vitamin E, Vitamin B1, Vitamin B2

PROPERTIES OF THE INGREDIENTS: HistoVet belongs to the group of phytobiotic with significant properties to Trichomonas spp., Histomonas spp. and anaerobic germs.

TARGET SPECIES: turkey, poultry, pigeons, zoo birds

DOSAGE AND ADMINISTRATION:

Turkey, poultry, : 1-1,5 L per 1000L water, 14 days (between 3.th and 5.th week.)
Premix, : 1 -2kg per 1T feed from first day of breeding up to 5. th week continuously.

PRESENTATION: oral solution: 1L, 5L

premix: 1kg, 10kg

HistoVet

HepaRen detox

Liver and kidney tonic

INGREDIENTS: sorbitol, choline chloride, betaine, lysine HCl, L-carnitine, flavoured plant extracts artichoke, rosemary, parsley, wormwood, fenugreek

PROPERTIES OF THE INGREDIENTS: HEPAREN detox has a strengthening effect on the metabolism and immunity, improving appetite and feed utilization. Enhance liver cell recovery and stimulate bile discharge, control cholesterol level in blood, having a positive impact on the digestive system, circulatory system and nervous system. Protect against disturbances caused by toxins, viruses. Frequent urination which aids kidney cleansing. Supplementation with plant extracts facilitates this process. Fast kidney cleansing is essential in urinary tract infection, gout, for food poisoning and in case of drug overdose.

DOSAGE: Systematic use for poultry:
1L per 2000L of drinking water for 5-10 days.

PRESENTATIONS: 250ml, 1L, 5L

premix: 1kg, 10kg

OligoBalance

electrolytes and energy

COMPOSITION: Calcium chloride, Sodium chloride, Dextrose, Potassium chloride

PROPERTIES OF THE INGREDIENTS: The preparation is a source of highly bioavailable and easily digestible nutrients that help to establish the physiological balance of water and electrolytes in the animal body. It is recommended in all situations where dehydration and loss of electrolytes can occur, especially during periods of heat stress, recovery after diarrhea.

DOSAGE:
premix: 300g / 1000L water 3-5 days
oral solution: 150ml / 100L water for 3-5 days

PRESENTATION:
oral solution 500ml, 1L, 5L
premix: 100g, 1kg

Ferti

Fertilization supplement

COMPOSITION: Vitamins C, E, L-carnitine, biotin, zinc, blend of dry plant extracts, selenium, folic acid

COMPONENT FEATURES:

Use of Ferti leads to optimal regeneration of the reproductive organs. Improves egg production, their number and conception. Ferti helps the animals increase their genetic potential and give as many eggs, healthy and uniform individuals in the flock as possible. Using this product in old animal layers can prolong of laying period, or if its necessary

DOSAGE: 1L /1000L drinking water

PRESENTATION: premix 1kg, 10kg
oral solution: 1L, 5L

VetCalm

Natural tranquilizer

INGREDIENTS: herbal mix of valeriana, melissa, vetiver, Mg sulphate

PROPERTIES OF THE INGREDIENTS :VetCalm is product that acts against environmental and heat stress, anxiety. Melissa officinalis (lemon balm) and Valeriana officinalis (valerian) have been used both traditionally and contemporaneously as mild sedatives, anxiolytics and tranquilizers. Animals are relaxed but not sedated. They act as a muscle relaxant not affecting animal's daily weight gain. They reduce negative effects of stress induced by high temperature, veterinary procedures and transport to slaughterhouses, during periods of hormonal excitation - particularly recommended for broilers in the final phase of fattening. As product has no residual effect on meat, it can be used before slaughtering. Using products by prescription has no influence on daily weight gain.

DOSAGE:

Premix: Dose is 1kg/1T of feed 3-5 days.

If its neccesary , repeat treatment after 7 days.

Oral solution: For all kind of animals , dose is 1ml/1L of drinking water for 3-5 days. If its neccesary, repeat treatment after 7 days.

It can be used in a long term perspective without any risk of side effects.

PRESENTATIONS: oral solution:1L, 5L

premix: 1kg, 5kg

AlphaTonic *stimul*

Starter liquid

INGREDIENTS: vitamins A, D3, E, C, K, sorbitol, choline chloride, betaine, lysine HCl, L-carnitine, flavored plant extracts rosemary, turmeric

PROPERTIES OF THE INGREDIENTS: AlfaTonic is intended to stimulate the growth and development of the gastrointestinal tract in young animals. It's an additive to feeds having a beneficial impact on the digestibility and assimilability of the feed. Better digestibility and use of the feed within the administration period of the preparation contributes to significantly higher final body weight. Can be used together with antibiotics.

DOSAGE: Systematic use 1L per 1000L of drinking water for 5-10 days.

PRESENTATION: 1L, 5L

BE-SL

Supplement for improving end of breeding, before slaughtering or transportation

INGREDIENTS: betaine, Mg, Anise EO, Rosemary, Melissa off., Valerian tinctures

PROPERTIES OF THE INGREDIENTS: BE-SL is recommended for end of fattening or exploitation period, before slaughter, transportation or on any other case of stress. It helps to animal for better feed intake and feed consumption.

Anise and rosemary produces a beneficial effect in period of water and feed intake disorders.

Melissa, Valerian and Mg makes animal more relax, not losing weight during transport or any other stressful situation. Animals are relaxed but not tranquilized and willing to eat.

Betaine has a role as an osmotic agent that is used by the cells in order to protect from osmotic stress, dehydration or high temperatures.

Using BE-SL product save money to farmers and make better profit!

DOSAGE: Systematic use for poultry : 1L per 1000L of drinking water for 5-10 days.
